Letter of Recommendation

John Dickson has been an active member of the World Trade Centers Association for more than a decade. He has created innovative conferences on globalization, inspired the establishment of a Committee on Peace and Stability Through Trade for the WTCA, and has a passion to develop World Trade Centers as solutions for regions of the world that have suffered from conflict and isolation. In order to take on these challenges, he and his associates have created a team of world class practitioners in each of the areas critical to regional economic development. I am most impressed by the vision and experience of this team. Their combined effort can address any of the obstacles to development in challenging regions or can greatly enhance and expand economic opportunities in mature economies.

John had demonstrated an ability to understand and fully utilize the value of the WTCA network. I am thrilled about this new initiative and highly recommend the World Trade Partnership to anyone seeking to enhance the economic potential of their region.

Sincerely,

Guy F. Tozzoli, President
World Trade Centers Association
